

SENIOR WEB DEVELOPER

Experience:

PRIVATE COMPANY

Senior Web Developer

October 2015 – Present

- Utilized **HTML, CSS, jQuery/JavaScript, Bootstrap, WordPress, PHP, Github**, and an assortment of other front-end web technologies on a routine basis
- Worked on changes and new experiences to the company websites (14+ websites and growing)
- Quickly learned to implement website's on WordPress, via GitHub and soon became the SME for GitHub integration
- Team focused programming and comradery were essential to the overall day-to-day when solving for client requests and everyday projects alike

PRIVATE COMPANY

Web and Applications Developer

September 2014 – September 2015

- Used **HTML - CSS - JavaScript - C#/.Net** - and many other technologies on a daily basis to create results-driven applications and experiences
- Learned a proprietary XML-based server-side scripting language, at a wildly accelerated pace, so that I could rapidly develop and prototype applications for my company
- Worked to implement data structures that would reduce overhead, and limit my company's further involvement with a given vendor to maximize profitability

PRIVATE COMPANY

Web Content Manager

March 2013 – July 2014

- Create and modify web pages and content, with a respect to mobile / tablet focused web development (**responsive web design**), in addition to traditional desktop web experiences, working with established frameworks (such as moderate **Bootstrap 3** experience)
- Daily usage of **HTML - CSS - JavaScript** used to create / modify web pages to achieve a goal of providing the customer a finished product
- Worked in an **AGILE** environment. The team I was on engaged in a 2 – 3 week sprint cadence, working on an enterprise level to provide solutions
- Used a Content Management System called (ContentOne) to create and modify pages and web content.
